INDEX

Welcome

Welcome to my vacation home!

You are on the western branch of Lake Como \ also known as La Riva Romantica .

Characterized by sudden and spectacular hinges, loops and gulfs, semi - hidden villas or on the contrary imperiously towering over the water.

Brienno with its two Romanesque churches retains the charm of an ancient fishing village. I thought I'd write the basic information to make your stay as simple and interesting as possible.

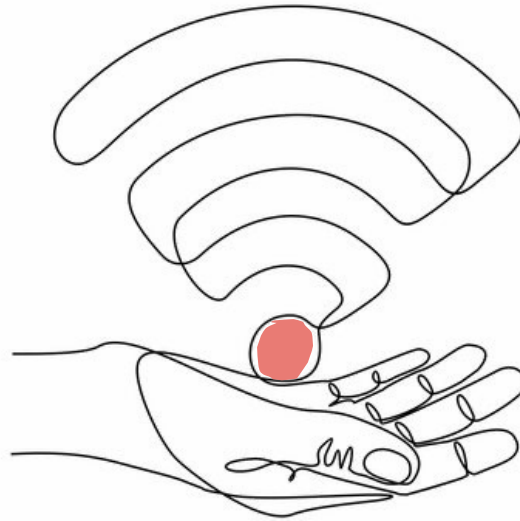

I will divide the guide into sections based on the topic covered.

LOCKS & KEYS

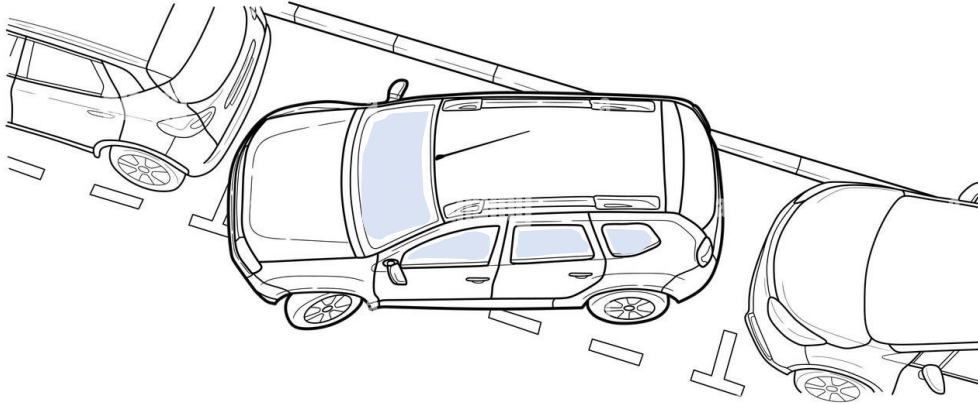

To the right of the gate in via
Brugascia there is a key box for self
check -i n

you will receive the code during
check-in

W I - F I

The Wi-Fi password is written on the
router in the 'Clouds' room

PARKING LOTS

We specify that in the months of July and August parking in Brienois difficult, especially during the weekend.

If you do not have, especially during the weekend, a place reserved for you, all the parking spaces marked with white stripes are available.

Usually, if you can't find parking in the town center, I suggest you look for the park after the old tunnel.

You cannot leave luggage or other goods under the house and then move the car to the parking lot.

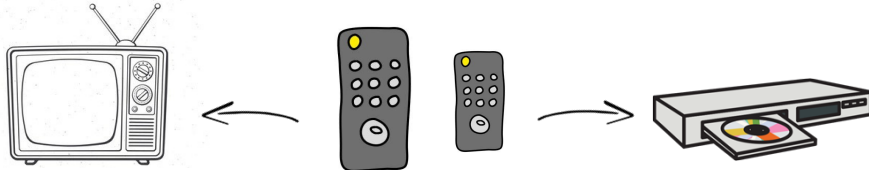

The lines marked with yellow stripes are free every day from 8 to 17, at other times they are reserved for residents.

Saturday and Sunday instead only for residents

TV-REMOTE CONTROLS

The television is a smart-tv as you see NETFLIX in your language, the remote controls are the largest black one for the tv and the smallest one for the dvd player.

They are supported on the piece of furniture.

White remote control is the one for switching on the split, there is one in each room and they act as a cooling or heat pump in mid-season.

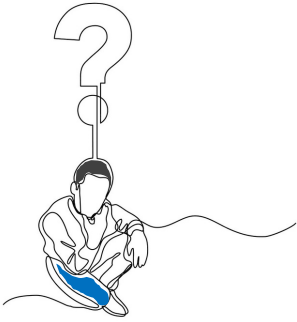

WATER TAP

The tap delivers both drinking water from the right lever and purified natural or sparkling water from the left sensors.

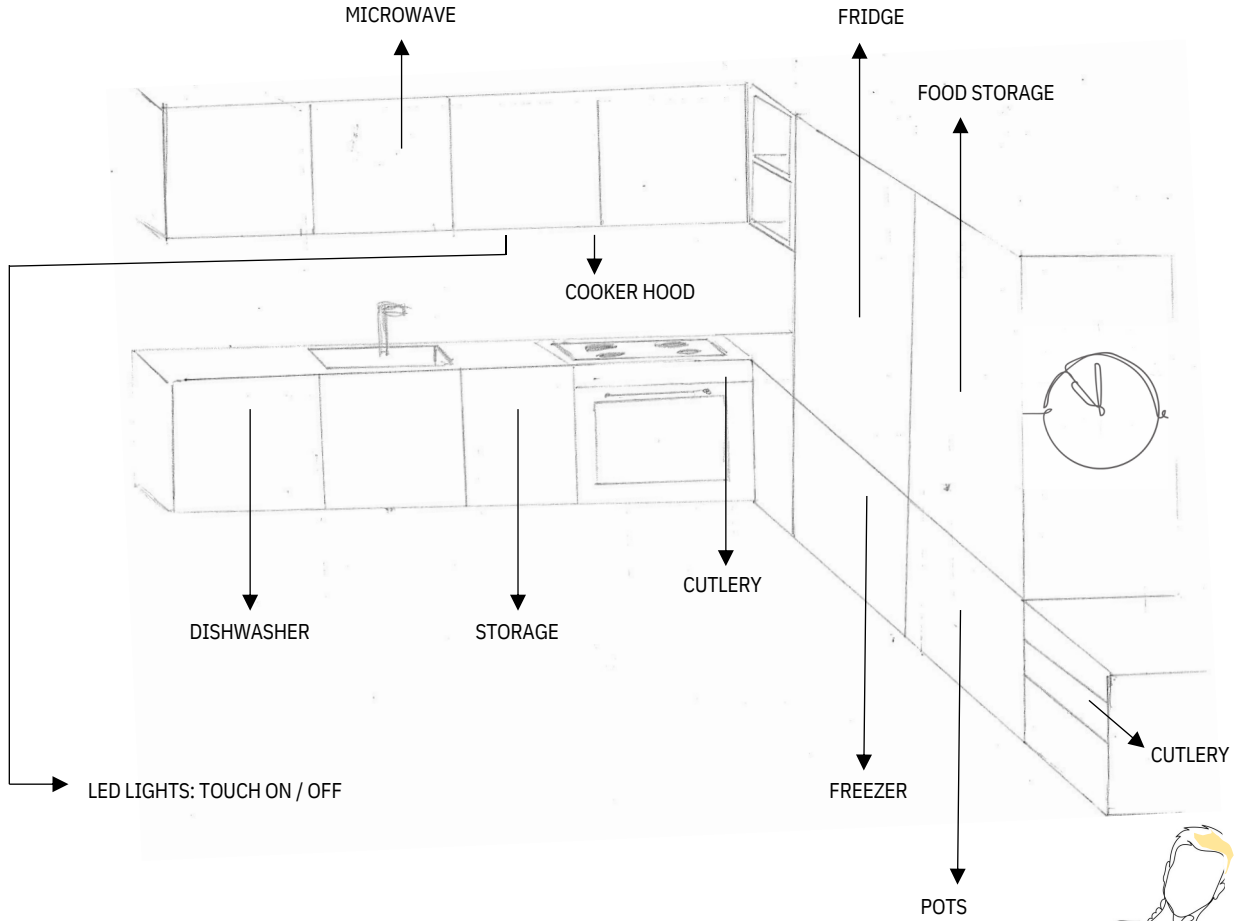

The upper one is for natural water and the lower one is for sparkling water

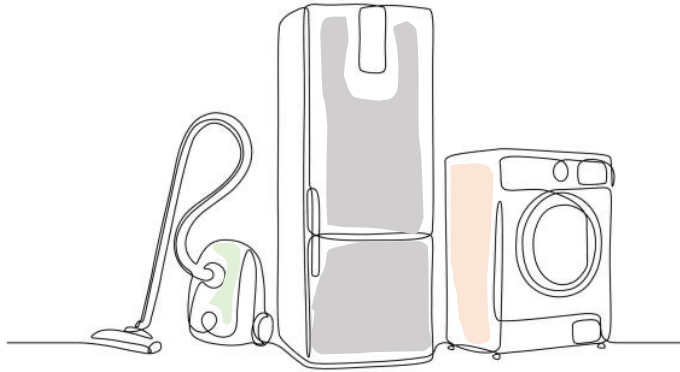

The refill bottle is under the sink

USE OF THE KITCHEN

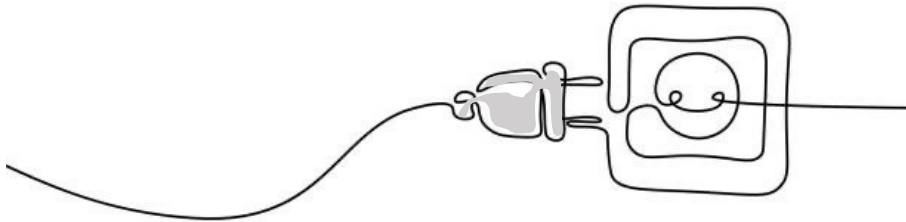

HOME APPLIANCES

The washing machine is located outside the Bath-room
In the outdoor garden there is an electric barbecue
(please put the plates after using them in the dishwasher
for cleaning).

PLUGS AND ELECTRICITY

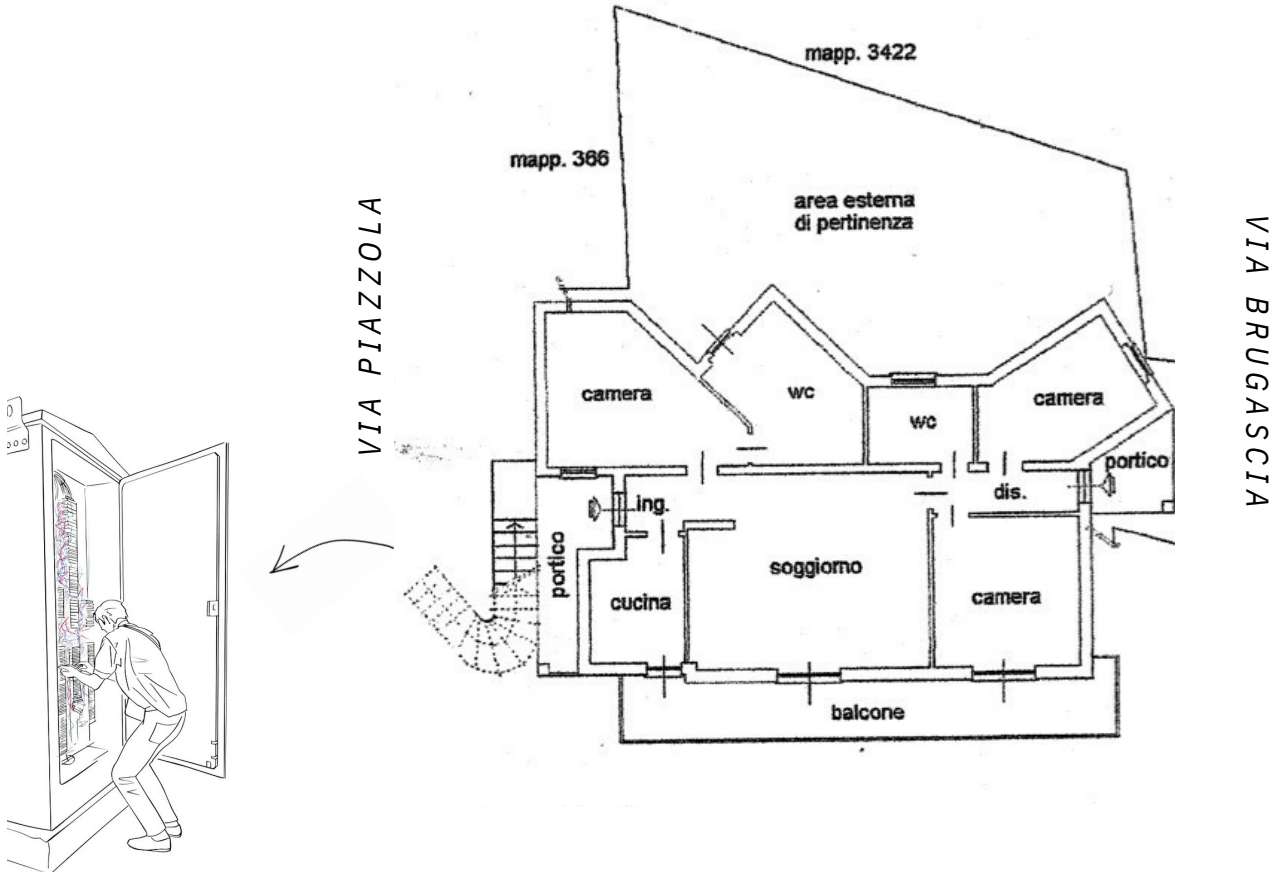

The extensions and adapters are found in the living room in the drawer

ELECTRICAL PANEL

If the power is cut off, look at the electrical panel if the circuit breaker has blown, if the switches are all on then check the electricity meter located on the street outside the house (Via Piazzola)

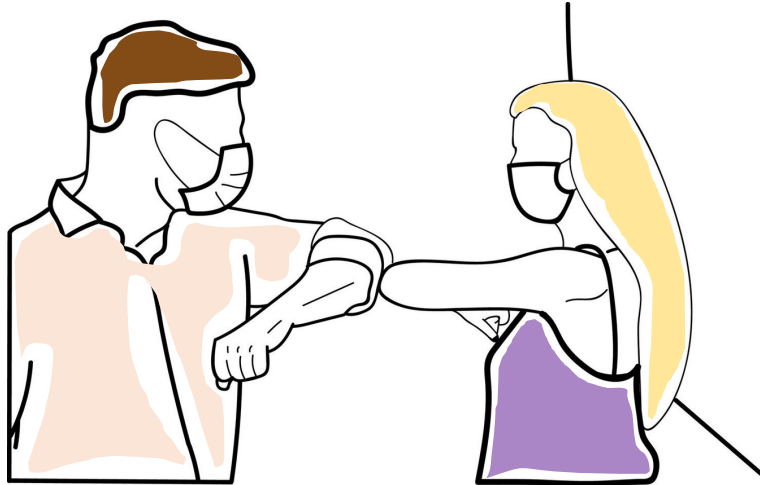

The padlock keys are inside the door on the right in the box

HYGIENE

Regulations regarding
health and physical
contact

The box of masks and the
sanitizer for the hands are
on a shelf at the entrance

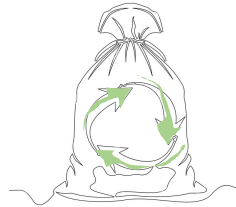

WASTE MANAGEMENT

In Brienno waste is divided into:

Plastic
Cardboard
Glass and cans
Biological
Undifferentiated

Glasses and cans are placed in the special "bells"

Located around the main road, there are several.

Everything else, divided by type, leads to the deposit located on the main road, after the church, on the left in the stone building under the olive tree.

It is expected that the waste is delivered to the special site at the expense of tourists

WHERE TO SHOP

If you need bread, cold cuts, meat, cheeses, you must walk two kilometers towards Como.

On the “Vecchia Strada Regina”, in Laglio, you will find “Da Luciano” where you can also have an ice cream, an aperitif, a quick lunch or a snack.

For the "big" shopping or for other needs I suggest you move to Cernobbio, 9km.

Always in the direction of Como Città, at the “BENNET” supermarket, which you will find immediately after the long tunnel.

If you are heading towards Menaggio you will find the SIGMA supermarket on the right as you arrive in LENNO.

HOW TO SPEND YOUR TIME IN BRIENNO

Brienno is a small and charming village, the main feature is serenity and peace.

You can visit the steep streets and stone tunnels, take beautiful walks following the paths upstream which allow you to admire splendid views of the lake.

Crossing the village on the main road, on the right before the old gallery there is a gate that leads to a terrace where you can sunbathe, swim and during the high season a kiosk is open for a drink, an aperitif, eat an ice cream or enjoy a light lunch.

In the period between May and September, at the small port in the town center it is possible to take a boat that connects the main towns of the lake.

There are usually two trips, in the morning and in the afternoon. The timetables attached in this guide and tickets can be purchased directly on board.

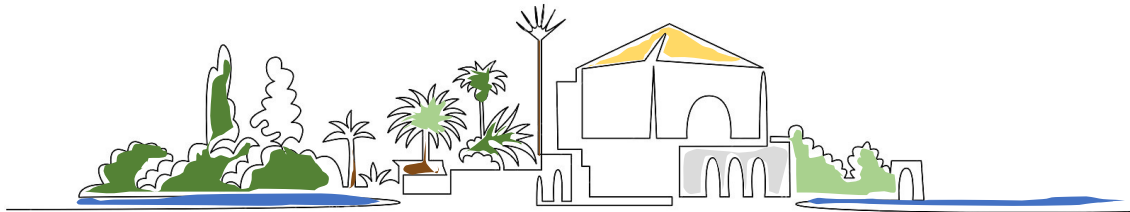

WHAT CAN YOU SEE ON THE LAKE

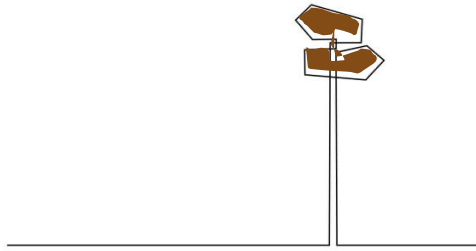

Considering that there is a myriad of activities to do and see on the lake, below find the list of the main locations not to be missed:

THE VILLAS

VILLA BALBIANELLO -LENNO
VILLA CARLOTTA -TREMEZZO
VILLA MELZI D'ERIL -BELLAGGIO
VILLA MONASTERO -VARENNA
VILLA CIPRESSI I GIARDINI -VARENNA
VILLA D'ESTE (HOTEL) -CERNOBBIO
IL GIARDINO DELLA VALLE (A BREVE DISTANZA DAL MURETTO
PERIMETRALE DI VILLA D'ESTE)
VILLA OLMO -COMO

THESE ARE SOME OF THE PLACES TO VISIT IN ORDER OF TOURIST INTEREST:

Bellaggio , known worldwide as ” **The Pearl of the Lake** ” . You can arrive by boat; walking through the small streets of the town, full of small typical artisan shops, jewelers, restaurants.

You can visit the garden of ” **Villa Melzi** ” “ Punta spartivento ”, a green park with a beautiful view of the lake and mountains.

Varenna , one of the enchanting villages on the lake; small colored houses like "Portofino". Famous is a suggestive “walk of lovers.

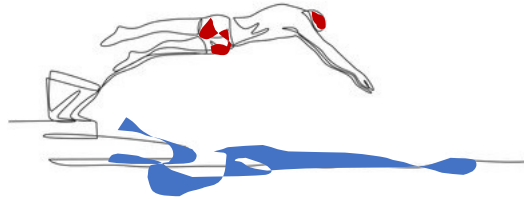

Absolutely to visit is the “Castello di Vezio ” which has dominated Varenna for more than 100 years.

The historic center of **Cernobbio** and the harbor square are worth a visit, where you can have lunch outdoors with a beautiful view of the lake, the mountain and the city of Como on the horizon.

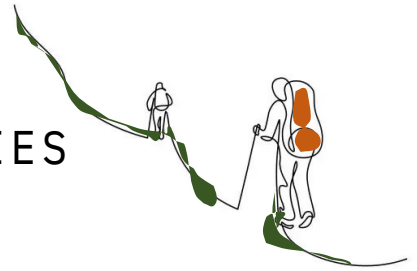

A famous location is “Villa D'Este ” where it is possible to dine and take a dip in a particular swimming pool floating on the lake, something unique...

Moltrasio is closer to Cernobbio , with its typical restaurants on the lake. I suggest "Ristorante Imperialino " for a romantic dinner located on a green outdoor terrace directly on the lake.

Como ; visited the historic center, starting from Piazza Cavour, where the main port of the lake is located, (I suggest a long walk along the coast of the lake with the Voltiano temple). You can visit **Brunate** (800 meters), you can park in Como. Once there, you can enjoy a beautiful view and the discovery of an old lighthouse.

RECREATIONAL ACTIVITIES

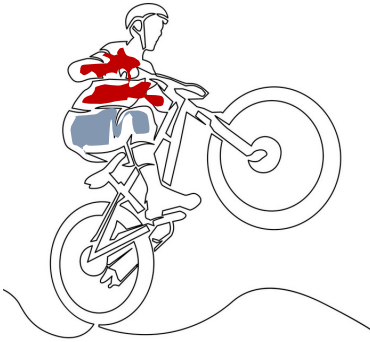

RENT A MOTORBOAT

Remember that the most beautiful lake view can be seen "only" from the lake.

You can rent a motorboat (with less than 40hp without a license) if you want to steer alone, or alternatively with a skipper:

Turati - Argegno	003931821268
Non solo barche - Cernobbio	00393292196837
AC BARCA - Menaggio	00393459010694
Comolakesboats - Domaso	00393334014995

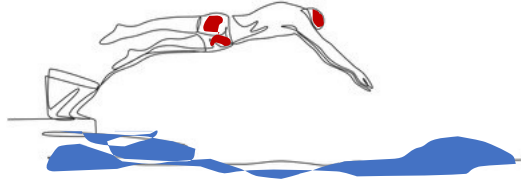

RENT A BIKE

By visiting the **COMO BIKE TOURS** website you can discover various itineraries for trips such as:

- Road Cycling
- Mountain Biking
 - E-Bike
 - Enduro

On the site listnride.it you can rent a bike and collect it in Argegno

LIDI LAKE COMO
SWIMMING / SUN

FROM BRIENNO TO COMO:

- LIDO VILLA OLMO
- LIDO VILLA GENO
- LIDO DI CERNOBBIO

FROM BRIENNO TO MENAGGIO

- LIDO DI OSSUCCIO
- LIDO DI ARGEGNO
- LIDO DI CADENABBIA
 - LIDO DI LENNO

OPPOSITE EAST BANK

- LIDO DI FAGGETO
- LIDO DI BELLAGIO

WALKS AND EXCURSIONS

- THE GREENWAY OF LAKE COMO:

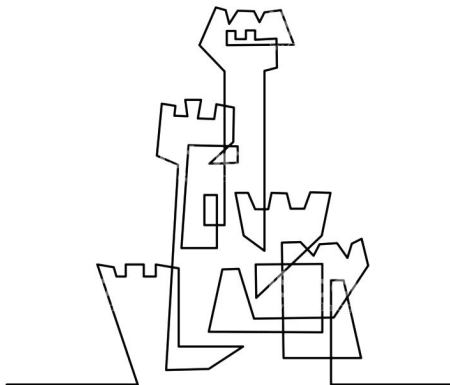

The most popular and can be traveled in all seasons.

The route goes from Colonnato Cadenabbia, it is about 10km long, to cover it all it takes about 3 and a half hours, you cross the villages and enjoy wonderful views of the lake.

- VIA DEI MONTI LARIANI:

A 125km long hiking trek. The route connects several locations from Cernobbio to Sorico. Along the way there are several shelters where you can find refreshment.

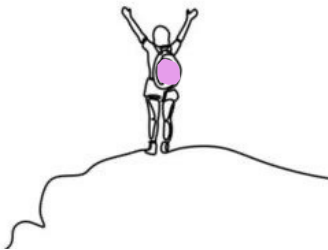

SPINA VERDE FROM CAMERLATA TO SAN FERMO

A classic trip with a compulsory visit to the Baradello Castle (for opening hours and guided tours, visit the site spinaverde.it).

The Baradello Castle is one of the symbols of the city, it is in a dominant position and on particularly beautiful days you can also see Milan.

The route can be taken from , taking Via Santa Brigida and from San fermo , climbing from Via Garibaldi

The walk can continue as far as San Fermo and eventually end at the Croce di Sant Eutichio, where there is a large iron cross and a panoramic point with a breathtaking view of the city.

• WALK OF THE BAITE DI BRUNATE

A classic trip out of town, it is a route of about 2 and a half hours without particular difficulties, it is recommended for the whole family and mountain bike enthusiasts.

It starts from the square of the Brunate funicular and you can continue towards San Maurizio, from there you go up to the locality of Cao, where the sanctuary of Santa Rita is located, it is the smallest in Europe. From Piazzale del Cao the itinerary continues on foot along a mule track that leads into the woods, from here begins the real walk of the huts, along the roads there are some refreshment points (Baita Carla, Baita Bondella, Baita Boletto) where it is possible to stop for lunch with typical dishes or have a regenerating snack.

Continuing the walk you will reach Monte Boletto, where you can admire the view and reach Monte Bollettone.

Finally, in another 2 hours of walking you can reach Monte Palanzone

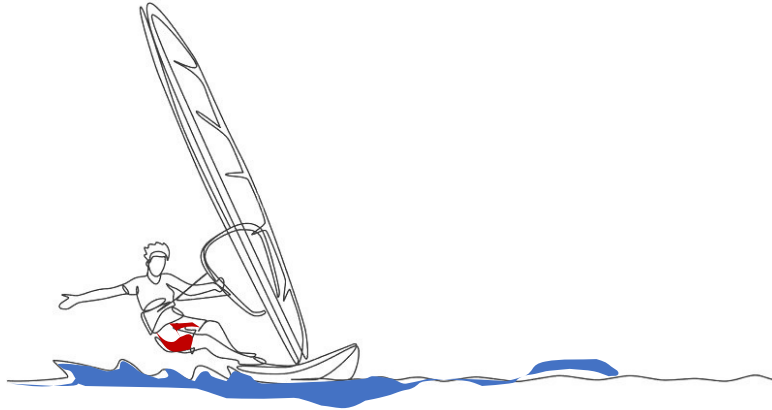

- MONTEPIATTO A TORNO AND THE PENDULA STONE

Another nice excursion on the lake is the one on Montepiatto in Torno, to discover the Pietra Pendula.

It starts from Torno, where on reaching Largo degli Alpini you go up to the right by a stepped mule track, halfway up you meet the 'Rock of San Carlo Borromeo'.

In Montepiatto the breathtaking view from the church of Santa Elisabetta is not to be missed. A few meters away is the Pietra Pendula, two rocks recognizable because in the shape of a huge mushroom, it is a block of granite.

WINDSURF

It is possible to practice Windsurfing in Alto Lario
in Dervio:

FunsurfCentre +39 3388148719

THE HISTORY OF BRIENNO

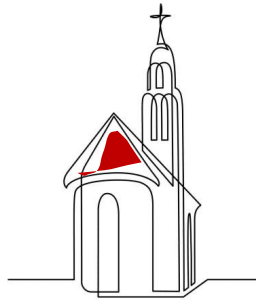

**THE HISTORY OF BRIENNO
GET TO KNOW AND VISIT
BRIENNO**

Brienno the " **Labyrinth Village** "

It is one of the most suitable and intriguing villages of Lake Como. Its charm is undoubtedly given by the tangle of alleys, stairs and arcades overlooking the stone houses, which climb up the mountain from the lake. Start walking, look at the details and from here start your beautiful journey

THE CHURCHES

There are three churches, the main one, in the town center, and those of Saints Nazaro and Celso.

The other two at the opposite end of the town are those of the Madonna Del Ronco.

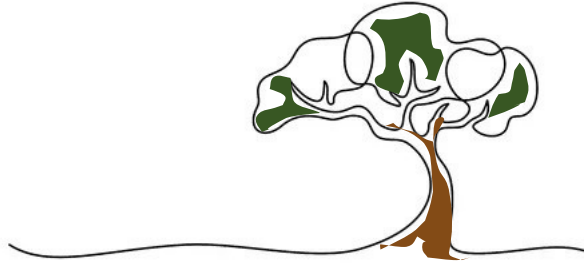

Those of Saints Nazaro and Celso in addition to being rich in decorations and stuccos, they keep in the sacristy both a relic of the emperor Frederick Barbarossa and a wooden statue of the child Jesus.

Enjoy the play of light created when the sun passes through the windows.

The organ placed above the entrance is a Sarassi, a family from Bergamo considered the greatest lineage of organ builders.

The church of San Vittore, also called di Sant Anna, is located at the entrance to the town coming from Como, built on a rocky spur, it is one of the oldest on the lake.

The church of the Madonna del Ronco (north end) is located above the old tunnel and it is worth looking for it if only for the splendid panorama that can be enjoyed from its square.

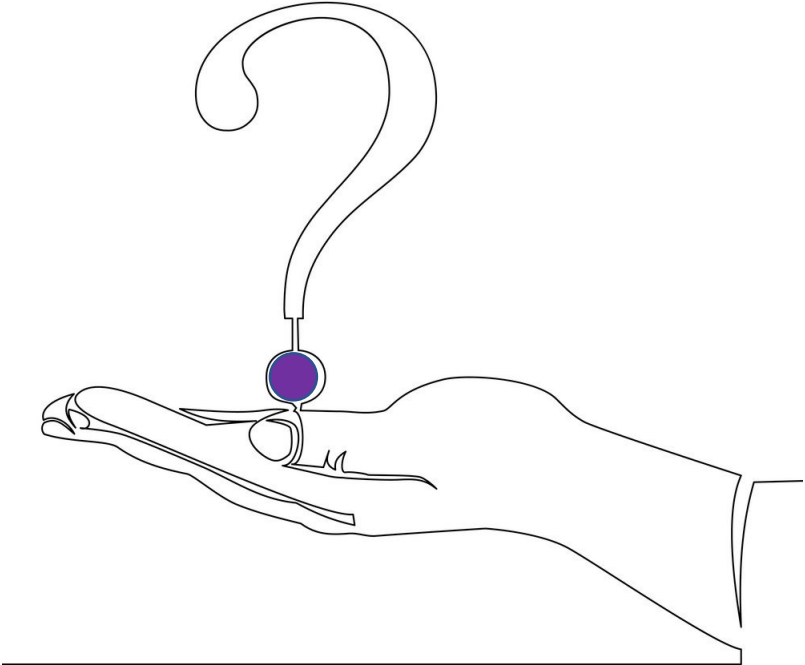

THE PUBLIC PARK

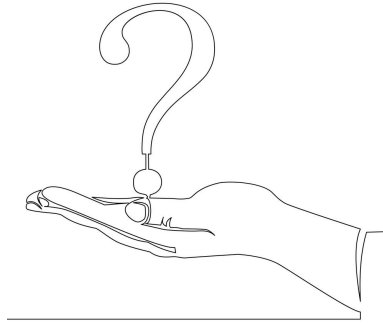

The public park is very small but the project won the prize in the national competition "public administrations and public spaces".

Here, enjoy a relaxing break, take flight, take a bath and have an aperitif.

POINTS OF INTEREST AND CURIOSITIES TO DISCOVER

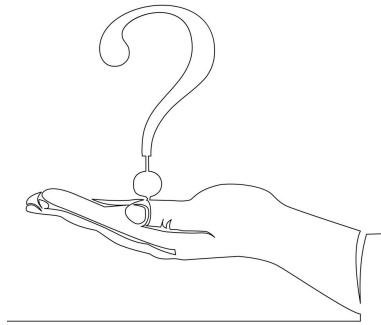

MINA GALLERY

A stone's throw from the public park there is an attraction, albeit curious, "the Mina Gallery".

There are only three of these tunnels and they are so called because they were filled with mines to be detonated to block the enemy's way in case of danger during the First World War.

THE HARBOR AND THE ANCIENT FILANDA

A stone's throw from the parish church there is the small port where the boats docked and next to it the important structure of the ancient spinning mill now converted into houses.

The latter was built in the first half of the 19th century to produce silk and worked until 1932.

The first room from the hall was the place where the women extracted the precious silkworm thread.

On the ground floor, there are the boiler and the factory.

Connected to the imposing chimney with direct access to the lake, where the goods were loaded onto large transport sailing boats, called "comballi" which carried the goods to the commercial port of Como.
